Tricks of the Trade

Blending design elements to create a beautiful home requires creativity, planning and expertise. Public TV's national design series *decor* gives its viewers the knowledge and most importantly the confidence to set a mood and create a statement for their own homes.

Join *decor's* designer **Debra Stein** as she conquers common design dilemmas — from making a small space seem larger to organizing bookcases and displaying collectables. And through her "Tricks of the Trade" segments she can show you how to turn your design problems into creative opportunities.
